Professional Summary

Passionate MERN Stack Developer with expertise in, and MongoDB, Express.js, React.js Node.js, JavaScript. A self-learner dedicated to crafting innovative web solutions and committed to seamless user experiences. Eager to contribute to digital transformation projects with a focus on quality code and creative problem-solving.

Technical Skills

- **Programming Languages:** JavaScript/TypeScript, Java, C, HTML5, CSS3
- **Framework & Libraries:** React JS, Next JS, Node JS, Express JS, Tailwind CSS, Bootstrap 5, Framer Motion
- **Backend & Databases:** RESTful APIs, MongoDB, Firebase
- **Development Tools:** Git, VS Code, Postman
- **Cloud & DevOps:** AWS (EC2)
- **Familiar with:** State Management (Redux-Toolkit), Data Structure and Algorithm

Projects

E-commerce Website ([Source Code](#))

- Developed and launched a fully operational e-commerce platform using Node.js, Express.js, MongoDB, EJS, HTML, and CSS.
- Implemented an intuitive shopping cart, seamless checkout, and diverse payment methods using Razorpay.
- Designed an admin panel with a comprehensive order management system.

CareTech ([Source Code](#))

- Built an online doctor booking system using MongoDB, Express.js, React.js, and Node.js.
- Integrated Redux Toolkit for state management.
- Added real-time chat functionality using Socket.io.
- Secure payment integration using Razorpay.
- Implemented JWT authentication for secure user access.

DailyDash ([Source Code](#))

- Developed a task management platform using TypeScript, React.js, and Node.js.
- Used WebRTC for video calls and Socket.io for real-time communication.
- Integrated an admin panel for user and task management.
- Implemented JWT authentication for secure user access.
- Added Google authentication for seamless user login.

Mini Projects

Real-time Chat App ([Source Code](#))

- Built a real-time chat app with React.js and Socket.io.
- Implemented active user status and backend with Express.js.

OLX Clone ([Source Code](#))

- Developed an OLX clone using React.js and Firebase Firestore.
- Added product listing and user-friendly product addition functionality.

Netflix Clone ([Source Code](#))

- Built a Netflix clone using React.js and TMDB API for content fetching.
- Used Axios for seamless API calls.

Education

- **Afzal-ul-ulama Preliminary:** Calicut University Distance Education (2020)
- **Self-Directed Learning:** Continuous learning and skill development in full-stack development
- **Brototype Bootcamp:** Intensive training in MERN Stack development (2023)
