Backend: Nodejs, Express.js, MongoDB, REST API, MVC Architecture, Mongoose, MySQL.

Familiar with: JWT Token, MySql.

Tools and Libraries: Postman, Figma, NPM, Yarn, GIT, GitHub, Multer, Nodemailer.

DevOps and Deployment: AWS EC2, AWS Route53, Nginx.

PROJECTS

MAGICCASKET

[Git-Repo](#)

E-Commerce Website

MagicCasket revolutionizes the crafting experience with its premier online store. Explore superior craft materials, add favorites to your cart, and seamlessly check out. Empower your artistic journey with a user-centric platform, offering top-quality crafting essentials. Immerse yourself in a world of creativity and innovation.

- **Technology Stack:** Built with **MongoDB**, **Node.js**, **Express**, **Bootstrap** and **EJS**, Magiccasket leverages a robust technology stack to provide a solid foundation for its e commerce functionalities.
- **User-Centric Shopping:** Users can seamlessly browse and add products to their cart and wishlist. And complete secure transactions using **Razorpay**. The user profile page enhances the experience with order tracking and coupon code application for discounts
- **Enhanced User Experience:** Magiccasket prioritizes user satisfaction with a user-friendly interface. It incorporates search and filter options to facilitate easy navigation and a customer-centric approach to online shopping.

- **Admin Dashboard:** The admin interface features a comprehensive dashboard for efficient management. Admins can oversee **products**, **coupons** and **user data**. The ability to **block** or **unblock** users ensures effective administration of the e-commerce platform.

MINI PROJECTS

Netflix Clone

[Git Repo](#)

Netflix Home page

Developed a clone of netflix homepage utilizing Angular with moviedb API and Bootstrap

- Integrates with movieDB API for accurate data
- Listed Movies based on categories.

Flipkart Clone

[Git Repo](#)

Cart Functionality

Angular 16 Flipkart Clone project using Fakestore API. Users can browse, add to cart and delete items, showcasing custom directives and pipes for an interactive experience.

- **User-Focused Interaction:** Developed an **Angular 16** Flipkart Clone, crafted for educational purposes. Users can seamlessly browse and add items to the **cart**, showcasing the implementation of **custom directives** and **pipes** for a comprehensive learning experience.
- **Study-Oriented Project:** Tailored for educational exploration, this project provides hands-on experience with **Angular 16**. While lacking advanced e-commerce features like checkout and wishlist, it offers valuable insights into web development concepts

Book Management

[Git Repo](#)

NgRx CRUD Operations

A website built with **Angular-16** and **JSON** server, capable of performing **Create**, **Read**, **Update** and **Delete** operations on book details.

- Explored the features of **NgRx State management**.
- Implemented **Store**, **Actions**, **Effects**, **Reducers** and **Selector pattern**.

EDUCATION

MEAN Stack Development

2022 - 2023

Self Stack, Calicut

Bachelor of Computer Science

2018 - 2021

Calicut University
