OBJECTIVE

I am a skilled MERN STACK Developer with experience in designing, developing, and deploying scalable web applications using MongoDB, Express.js, React.js, and Node.js. I excel in both front-end and back-end development, handling database management, server-side logic, and client-side scripting to deliver responsive, high performance web solutions. I am proficient in Mern Stack and I collaborate effectively with cross-functional teams to meet client requirements and industry standards. I stay updated with emerging technologies and best practices to drive innovation and enhance project efficiency.

EDUCATION

Bachelor of Computer Science, RR Institute of Technology 2020 - 2024

* Relevant Coursework: Data Structures and Algorithms, Database Management Systems and Web Development .

Plus Two, GMHSS Cheeral 2018 - 2020

* Activities: Participated in state-level Mathematics competitions (Applied Construction)

SKILLS

Web Development	HTML, CSS, JavaScript, Bootstrap, Media Queries, Tailwind CSS, TypeScript React.JS, Redux, Next.Js, Zustand
Backend Development	Node.js, Express.js, MongoDB, PostgreSQL
Other Tools	Webpack, Netlify, Firebase, Postman, Mongoose, Git, GitHub, Figma, UI Design

EXPERIENCE

Full Stack Developer March 2024 - Present
Brototype *Trivandrum, Kerala*

- Completed an intensive internship at Brototype, a self-learning platform focused on full-stack web development. Gained hands-on experience with the MERN stack by successfully delivering two major projects and several smaller ones, demonstrating skills in designing and implementing web applications.
- Strengthened problem-solving, coding, and debugging abilities while collaborating with peers and mentors. Improved project and time management skills, ensuring the timely delivery of high-quality code and enhancing expertise in modern web technologies.

PROJECTS

Tradeing Club . Designed and developed a robust trading platform as a complete MERN stack project, featuring dual login systems for regular users and trading experts. Integrated a subscription service allowing users to receive real-time trade alerts and actionable insights. Built an extensive learning module where users could study trading strategies and techniques.Enhanced user engagement by implementing chat and video call functionalities for seamless interaction between users and trading experts.! ([Try it here](#))

Wuzzy's Toys, Ecommerce . Developed a comprehensive eCommerce website, "Wuzzy's Toys," offering a diverse range of toys for purchase. Led the project from conceptualization to implementation, including both the user-facing platform and an admin panel for product management. Implemented essential functionalities such as user authentication, payment gateways, and product management.([Try it here](#))

Web Development Projects . Engineered multiple dynamic CRUD applications with MongoDB, Node.js, and Express.js, demonstrating expertise in database management, server-side logic, and client-server communication. Showcased proficiency in web development technologies and cultivated strong problem-solving, creativity, and attention to detail skills.([Try it here](#))
